AjiPro-L™

Rumen Protected Lysine

A RELIABLE SOURCE OF LYSINE FOR MILK PRODUCTION

AjiPro-L provides an optimal balance between rumen protection and delivering a highly-available source of L-Lysine to the small intestine.

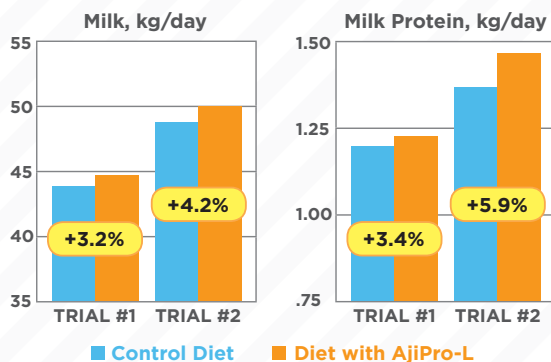

At the heart of AjiPro-L is a matrix of L-Lysine HCl and vegetable oil that resists physical and microbial breakdown as it passes through the rumen. When AjiPro-L reaches the small intestine, L-Lysine is made available for absorption and utilization as bile salts and lipase digest away the vegetable oil.

Increase Profit with AjiPro-L

Field and controlled research trials demonstrate that when the Lys/MP (Metabolizable Protein) balance is improved with AjiPro-L, milk and milk protein could be increased.

	Trial #1		Trial #2	
	Control	AjiPro-L	Control	AjiPro-L
Lys/MP, %	5.80	6.20	5.53	6.04
Experimental Period	DIM 28 to 56		8 weeks from avg. DIM 79	
Supplementation Dosage, g AjiPro-L/cow/day	0	75	0	95
Milk, kg/day	43.2	44.6	48.0	50.0
Milk protein, kg/day	1.18	1.22	1.35	1.43
Milk fat, kg/day	1.66	1.84	1.72	1.82

Trial #1: Abstract #215, 2010 JAM of ADSA-PSA-AMPA-CSAS-WSASAS-ASAS
Trial #2: Abstract #1051, 2010 JAM of ADSA-PSA-AMPA-CSAS-WSASAS-ASAS
